Definitions:

“Modified” refers to a vehicle that has been materially altered from its original factory configuration. For example: the substitution of a modern engine for an original engine qualifies as “modified.” The same is true for material upgrades to the suspension, transmission, wheels, and interiors (non-original patterns and fabrics).

“Survivor” refers to a vehicle that is preserved in mostly factory-original condition: original mechanicals, body panels, paint, and interior. Some minor repairs and preservation work (performed to keep the vehicle road-worthy) is acceptable. Major restoration work would disqualify a vehicle from participating in this class.

Note concerning non-modified vehicles:

Vehicles carrying the following non-original safety-related equipment may be entered in “non-modified” classes: seat belts, radial tires, turn indicators, and safety glass.
